DIAMOND BLADES

We are committed to providing you with tools made from the finest synthetic diamonds, using only raw materials of the highest standard and quality. We guarantee the best concentration of diamond and ensuring the ideal combination of speed of cut and superior diamond tool life. The hardness of diamond allows dry cutting of stone, concrete and other building materials. Diamond-edged blades cut extremely fast and will last at least a hundred times longer than traditional bonded abrasive discs.

- Continuous rim blades - ideal for fine cutting of the hardest material such as Marble, Ceramic or Tile.
- Segmented blades - a general purpose blade for cutting Stone, Concrete, Thermal Block etc.
- Turbo Rim blades - ideal for fast, consistent cutting depth in Universal Materials like, Stone, Ceramic, Granite etc.

WIRE CUPS & WHEELS

These wire wheel cup brushes are fitted with captive M14 nuts to fit standard angle grinders and variable speed metal polishing machines from 115mm upwards. The twisted knot steel brushes are for applications requiring high aggression such as heavily rusted steel and welds. The crimped wire uses brass coated steel to give more controlled action for lighter coatings removal, cleaning etc.

PLYWOOD

COATED ABRASIVES

COATED ABRASIVES

Manufactured using a heavy weight paper backing with an Aluminium Oxide grain. Light machine or hand sanding. Mirlon is a flexible 3 - dimensional non-woven fibre sanding material, which provides an excellent surface finish, and conforms to profiles easily. Copper alloys, brass, bronze, wood, mild steel and stainless steel. Green is general purpose grit 320. Maroon is very fine grit 360. Craft-backed paper coated, with aluminium oxide grain for sanding of all timber products - available in grits P40 - P220.

Light machine or hand sanding. All types of wood. Multi purpose flexible cloth backed product, coated with aluminium oxide grain. Removing tool marks, rust and scale, contour sanding, deburring and general purpose finishing. Ferrous & non ferrous metals, wood and leather. Latex impregnated paper (waterproof) product coated with silicone carbide grain for fast and superior finishing in the Automotive Industry. Light machine or hand sanding.

BONDED ABRASIVES

Reinforcement provides added strength for aggressive cutting. Thin cutting wheels deliver accurate, clean cuts. Best for use on steel, structural steel and iron. Long wheel life on heavy duty applications. Smooth outer layer reduces friction that translates to an effortless cut and less kickback during operation. Open arbor offers a cost-effective mounting option when using adapting nuts.

STEEL

Bonded Abrasives - Cutting Discs -Steel
